Smart Cards, EFT, Credit Card Processing Systems, Ecommerce Software from Retail Logic

Inspirations, Answers and Solutions

Everything you need to know about Smart Cards, Electronic Funds Transfer (EFT) or credit card processing systems but were afraid to ask....

Smart Cards

To enable retailers to make the transition to Smart Cards, Retail Logic has developed an integrated Smart Card solution - Smart-Solution™ - *the world's first EMV Level 2 accredited Chip and PIN solution for integrated EFTPoS equipment.*

Accept Credit Cards and Debit Cards

EFT or credit card processing systems are, by their very nature, business critical. EFT or credit card processing systems enable companies to accept credit cards (and debit cards, purchase cards, store cards and smart cards) and can have a big impact on profitability as well as customer satisfaction if they go wrong.

Solve Product Suite

Retail Logic's credit card processing solution, Solve Product Suite, is at the very forefront of EFT. Our solutions are deployed in many of the UK's leading retailers, as well as many other industry sectors. With this website we have tried to answer your questions about EFT, give you inspiration on how to move forward, and hopefully provide an appropriate solution for you to be able to process electronic transactions.

Please feel free to browse our site. Any questions you have or additional information you need are only a click away. And while you're here - we would appreciate any feedback you may have.

Please note that the Retail Logic credit card processing solution, Solve Product Suite, enables companies to process any plastic card; credit cards, debit cards, purchasing cards, store cards and smart cards, but for ease of use the term credit cards is used throughout the site.
